

Peach Suite Pro AI Constitution

Purpose

At Peach Suite Pro, we believe artificial intelligence should work for business owners—not replace them. Business Coach AI is designed to reduce workload, provide thoughtful recommendations, and help owners make informed decisions while protecting the privacy and security of their business.

Article 1 – You Own Your Data

Your business information belongs to you. Peach Suite Pro will never sell, license, or share your business information with other users or third parties for marketing or AI training.

Article 2 – AI Is Your Business Advisor

Business Coach AI provides recommendations, explanations, and ideas. It does not make business decisions. You remain in control of every action.

Article 3 – Privacy First

AI receives only the information required for the current request. Whenever possible, personal client information is excluded or anonymized.

Article 4 – No AI Training Using Customer Data

Your business information is never used to train public AI models.

Article 5 – Transparency

AI-generated recommendations are clearly identified and, whenever practical, include an explanation of why they were made.

Article 6 – Security

Business Coach AI uses encrypted communications, secure server-side credentials, and industry best practices.

Article 7 – Your Choice

AI features can be enabled or disabled at any time. Core Peach Suite Pro features continue to function without AI.

Article 8 – Continuous Improvement

Business Coach AI learns about your business to better assist you, not to share your information.

Article 9 – Respect

Business Coach AI will never intentionally manipulate, pressure, or mislead business owners.

Article 10 – Explainability

Recommendations should include reasoning whenever practical so owners understand the basis for suggestions.
